Hervey's Theron & Aspensio
Vol 1. Page 150

An Asiatic Queen, departing this
life, left behind her three accomplished
sons; all arrived to years of
maturity. — The young Princes were
at strife; who should pay the highest
Respect to their royal Mother's memory.
To give scope to their generous contention,
they agreed to meet at the Place of her
Interment; and there present the most
honorable Gift, they knew how to devise,
or were able to procure. — The Eldest
came and exhibited a sumptuous ~~burial~~
monument; consisting of the richest
materials and ornaments with the
most exquisite workmanship. — The
second ransacked all the Beauties
of the blooming Creation; and
offered a Garland of such admirable
Colors, and delightful Odors, as had
never been seen before. — The
youngest appeared without any
 pompous Preparation; having only
a crystal Basin in one Hand, and a
silver Bodkin in the other. As soon
as he approached the Tomb, he thrust
open his Breast; pierced a Vein that
lay opposite to his Heart; received the
Blood in the transparent Vase; and

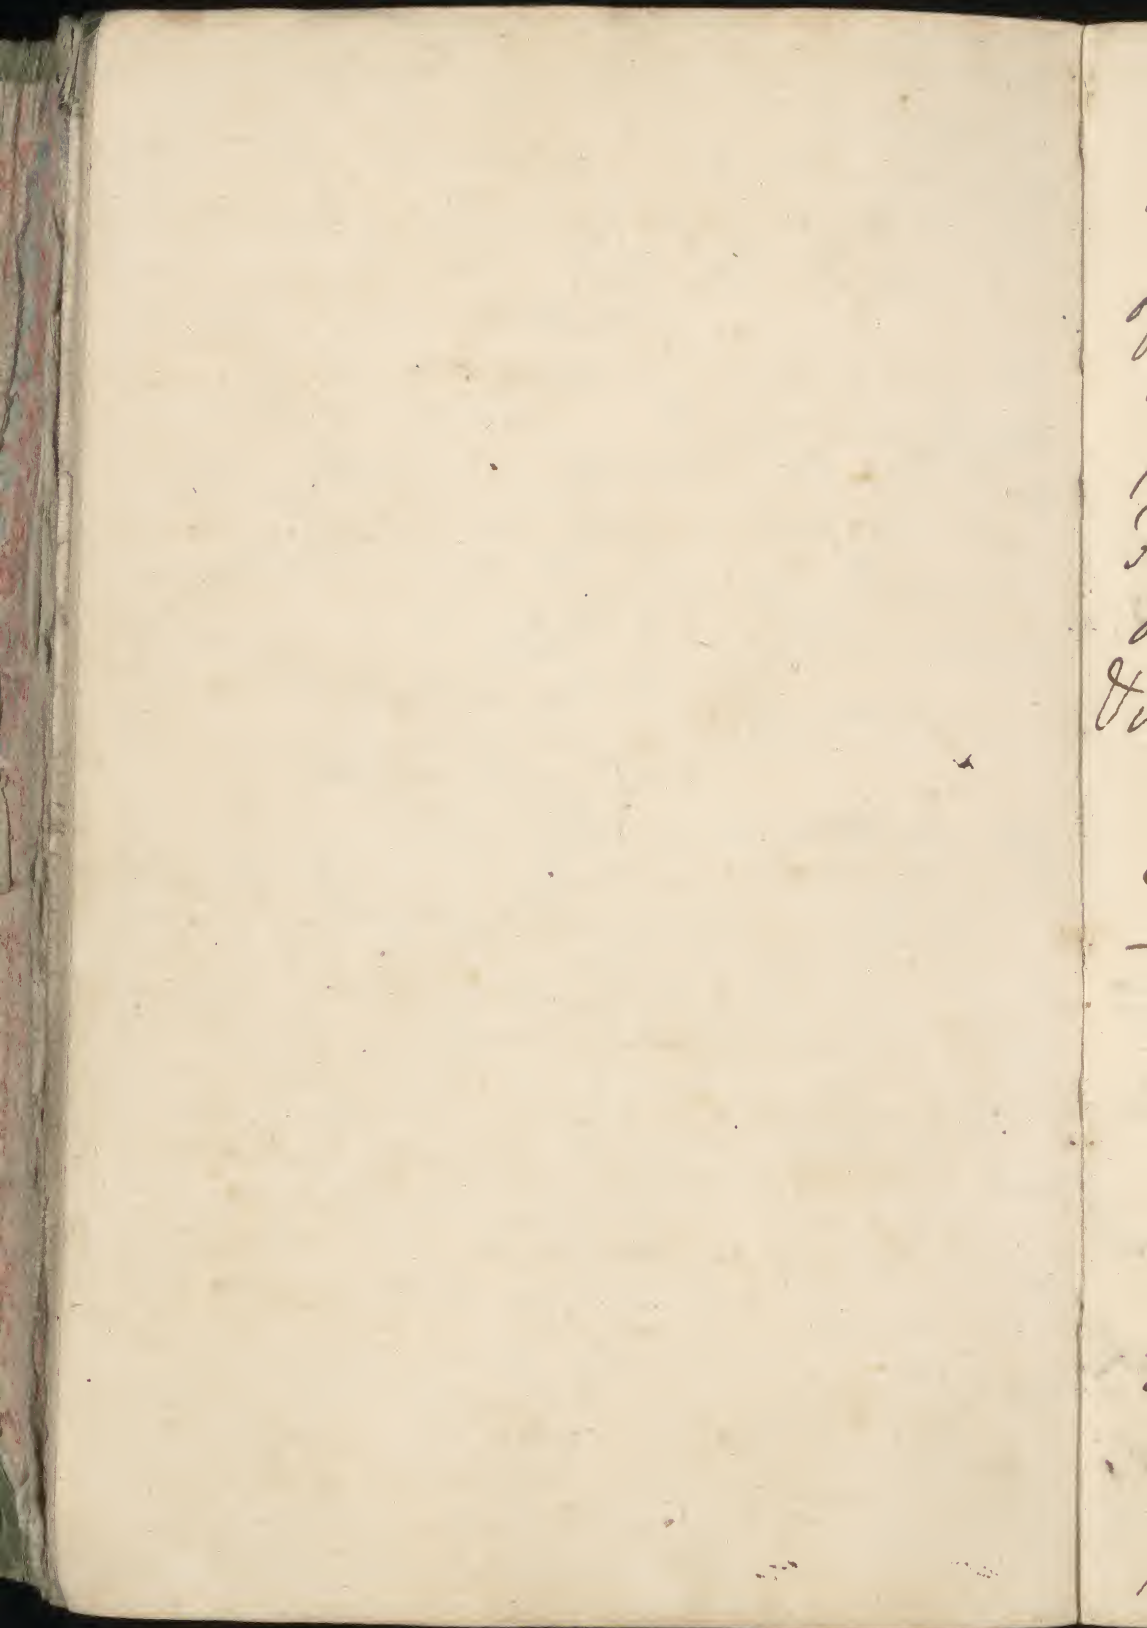

with an Air of affectionate Reverence,
placed it on the beloved Parent's monument.
— The Spectators, struck with the sight,
burst into a shout of general Applause;
and immediately gave the Preference
to this last Oblation.

If it was reckoned such a singular
Expression of Love, to expend a few of
those Precious Drops, for the Honour
of a Parent: O! how matchless! how
ineffable was the Love of Jesus, in
pouring out All his vital Blood,
for the Salvation of his Enemies!

Vol. 1. Page 215.

It is related in Ecclesiastical History, That
when the Emperor Julian was setting out
upon his Parthian Expedition, he threatened
to persecute the Christians with the utmost severity,
as soon as he returned Victorious. — Upon
this Occasion, Libanius the Rhetorician asked
one of them with an insulting Air; "What
the Carpenter's Son was doing, while such a
Storm hung over his Followers?" The Carpenter's
Son, replied the Christian; is making a
Coffin for your Emperor. — The Event proved
the Answer to be prophetic. For, in an
Engagement with the Enemy, the royal
but wicked apostate was mortally
wounded; and cried with his expiring
Breath, Vicisti, O Galilee! I am
vanquished, O Galilean! Thy Right Hand
bath the Preheminent!

with the utmost degree of truth it may be boldly said, that this is one of the most useful medicines ever discovered and offered to the Public. Having observed its astonishing effects for many years in my private practice, I was induced to examine the composition more narrowly, and by various attempts at different times, have at length brought it to that degree of perfection, as justly to challenge the Preference to any other publication of its kind. To fix the extent of its usefulness among private families, and various disorders persons is impossible, as daily experience discovers virtues and uses unknown to the Author: but out of a multitude of these I shall only mention a few of those cases, in which, by abundant experience, it hath proved itself most excellent, beyond any else I know, or that, perhaps, ever has been discovered.

1. Inwardly taken, ~~either~~

It either cures or greatly relieves most kinds of Coughs, and particularly the Chin-cough in children, also those

attended with short and painful breathing, and often prevents, and even stops a beginning Consumption; yea, not seldom cures when the lungs themselves are ulcerated.

In sore Throats, even of the putrid kind, attended with a difficulty of swallowing, when the patient is in danger of being suffocated; a few tea-spoonfuls mixed with coarse sugar and a little often swallowed, or dissolved upon the tongue, and between times the throat moistened with barley water with a fig or two boiled in it, and a plaster of ^{my} ~~my~~ ~~Rheumatism~~ or Toothach salve applied ~~outwardly~~ to the throat, it will be found often to succeed when the case is most desperate, and every other remedy fails; taken in time it puts a stop to it. In spitting or vomiting of blood, and all inward weakneses or pains in the breast it certainly has scarce its equal.

Also in Cholics and distressing windy complaints it is a ~~very~~ speedy remedy, taken from 20 to 40 or 50 drops at a time upon sugar and repeated if necessary; it may be followed to advantage after, with a

table spoonful of my anodine mixture.
In weak or decayed people who are brought
low by age, sickness, surfeits, consumption
&c. it is found exceeding serviceable to restore
their strength, and repair the spirits.
Woman after hard labor in child-birth,
and tender, delicate, low-spirited people,
will find it ~~very~~ advantageous; as also
for weakly children, and such as are
inclined to rickets, windy ruptures, &c.
to be taken upon sugar coarse or fine,
or the sugar may be melted, after it is
dropped upon it, in a little water, or
wine & water from 20 drops for a
man or woman in common cases,
but to 60 or 80 in violent or desperate
cases. For children as many drops
as they are years old, or double if
necessary to be taken at any time,
night or day, from 4 to 6, 8 or 10 times
in 24 hours.

N.B. In the gravel, one meat spoonful
has been taken at once, and has given
almost immediate ease, by bringing
away sand &c. Large doses have done
wonders in strong persons in various
disorders.

2. Outwardly used, It certainly and

desperate and deep cuts or wounds,

if immediately applied; drop or pour it repeatedly on the wound, bind or stitch it up so as to keep the lips close, and without opening it again, pour fresh balsam upon the lint or linen, three or four times in a day, it will soon be well. In burns or scalds, It draws out the fire before a blister can rise, and speedily cures in the most desperate cases; pour it upon the part freely, or besmear it with a feather. Two or three drops put into the ear generally cures the ear-ach. applied with cotton to a rotten tooth, and the gums rubbed with it in the tooth-ach often gives instant ease, and helps the recovery in the mouth.

3. Among the brute Animals, It is found of such excellent use, that no farmer, grazier, or dealer in cattle, ought to be without it,

As for Horses in quinsies, coughs, surfsits, &c. but above all in the gripes and belly ach, it is a certain and almost instant cure, of which I could give the most satisfactory evidence, in a multitude of desperate cases.

cases both for horses and cows, the
dose is one bottle, either given alone
or in a pint of warm ale, and to be
repeated if necessary. Occasion
requires it. Note, Let them fast

In cut, wounds, bruises and the
like, it cures to a degree of wonder all
sorts of animals.

Nor is it less serviceable in sheep
to prevent the rot; if taken in time

gargling both of the Eyes, and after
lambs; especially to cure the red

does if given while life is in them, to

prevent the rot three tea spoonfuls
must be given and repeated, as
necessity requires for some times.
I give one Shilling the bottle, with
directions to each bottle.

Take Half Ounce of Jesuits Bark
Half Ounce Ground Ginger
One Nutmeg Ground or Grated
40 Drops Balsam Sulphur
30 Drops Surroub Popy
20 Drops Oil of Anniseeds

Mix them well up in a little Treacle,
take it and go to Bed, just as
the Fit is coming on. Be sure
to keep it on the Stomach or it
will do no good. It will cause
a great Sweating & Thirsting.

NB. Beware of taking Cold in
the sweating Time and also of
drinking. The Patient should
have nothing to drink for
two Hours, from the Beginning
of the sweat, except a little
warm Ale or wine & water.

1 Pound of Red-lead

1 Pound of white-lead

1 Quart of Florence Oil

Mix them all together in
an earthen Dip tin, well
glazed, till it is very
smooth. Then set it on a
slow Fire, and let it simmer
for 2 Hours, stirring it all the
Time, till it is of a light
brown Colour, then pour it
out - The Dish is first to be
rubbed with oil of Olivarie
before the Fire. It has cured
a Leg when the Patient was
preparing to have it cut off:
likewise Cancers in the Breast
and white Swellings when
burned out of Hospital.

Alexander's Travels.

4. Alexander M. travelling thro some desert in arms, himself & his army were in great straits for want of water: and one of his soldiers having to long been ready to die with thirst, sought up & down, but found a little water, with which he filled a leather-bottle, and so was running with it to his horse; but by the way meeting Alexander he filled out the water in a dish, and proffered it to him: Alexander asked him whether he was carrying it? The man told him, that his horse was ready to perish for thirst! But said he, "Pray you, Sir, do you drink it; for if my horse & I can get more, but if not I shall not have such another thing"; whereupon he gave him the water again, and did him carry it to his horse. But

Handwritten text in a cursive script, likely Chinese, covering the page. The text is arranged in vertical columns, reading from right to left. The ink is dark and the paper is aged and slightly discolored. The script is highly stylized and fluid, characteristic of traditional Chinese calligraphy. The text appears to be a continuous passage, possibly a letter or a section of a book. The right edge of the page shows the binding of the book, and the left edge shows the adjacent page.
